

EMF Explained Series

EMF AND CANCER - L1

[INTERPHONE Explained - click here](#)

Summary

There has been over 50 years of research conducted worldwide to investigate possible health effects, including cancer of mobile phones, base stations and other wireless devices.

In relation to radio frequency emissions and health, the general conclusions from the World Health Organization (WHO) are;

- *"Despite extensive research, to date there is no evidence to conclude that exposure to low level electromagnetic fields is harmful to human health"*
Summary of health Effects – Key point 6 <http://www.who.int/peh-emf/about/WhatisEMF/en/index1.html>
- *"A large number of studies have been performed over the last two decades to assess whether mobile phones pose a potential health risk. To date, no adverse health effects have been established as being caused by mobile phone use."*

[WHO Fact Sheet 193 June 2011 - Electromagnetic fields and public health: mobile phones](#)

Mobile phones, base stations and other wireless devices are designed to comply with the international guidelines on exposure limits.
